Xaverian College

Ofsted
Outstanding
Provider

Your options following Year 11

If your heart is set on Xaverian, we offer A Levels, V Levels and Applied Courses. There are many courses open to you, so do make sure you consider all the options out there.

A Levels

A Levels are seen as the most academic route. You're assessed mainly through exams at the end of the two years.

Applied Courses

Applied Courses focus on building practical skills and experience in a specific area. You will be assessed through a mix of coursework and exams.

V Levels

These cover a broad range of employment areas. You will be assessed through a mix of coursework and exams and there is no mandatory work placement.

T Levels

T Levels are similar to Applied Courses, they are built around high-level skills in a specific area with a work placement of around 45 days.

Apprenticeships

Earn while you learn. You will study towards a qualification and have a paid job with an employer, whilst working towards a specific career path.

Staying in full-time education:

Sixth form college

Expect mostly A Levels with some additional qualifications. You will have more independence and it's seen as more of a stepping-stone to university.

Further education college

They offer a broad range of A Levels, T Levels, and Applied Courses, often alongside Apprenticeships and Foundation Programmes.

School sixth form

It is similar to Year 11 but with a few more freedoms added on. They normally offer A Levels alongside some additional qualifications.

Independent training providers

You could choose to combine a qualification with an activity, such as a sport academy where you train and compete whilst studying a BTEC in Sport.
